

Client:	Safran Landing Systems
Location:	Mirabel, Quebec
Building Type:	Industrial
Contract date:	2015
Surface Area:	285,000 sq. ft.

World leader in aircraft landing and braking systems, Safran supports more than 25,000 aircraft, making over 40,000 landings every day for the Airbus aircraft A320, A330, A380, A350 and the Boeing 787. The Safran plant is located in Mirabel and employs nearly 300 people.

Since October 2015, ENGIE has been providing all FM services and energy management for the Mirabel site. This mandate extends, to Canada, the long-term existing business relationship between ENGIE and Safran. By outsourcing its FM services, Safran group benefits from the international experience of ENGIE's multidisciplinary teams, combined with a local presence.

ENGIE has been an FM service provider for several Safran Group sites around the world for many years.

Mandate

ENGIE provides all FM services at the Safran plant in Mirabel. ENGIE is committed to optimizing its overall performance during its contract term through the implementation of a progress plan. Specifically:

- Multi-technical operation and maintenance (air compressors, boilers, HVAC systems, lighting, doors, dock leveler, cranes, forklift and building automation system)
- Janitorial and pest control
- Exterior maintenance and snow removal
- Architectural maintenance
- Uniform management
- Cost reduction plan including energy consumption

The corrective maintenance program includes a \$1,000 deductible for all equipment repairs under contract.
