

Client:	Ville de Côte-Saint-Luc
Location:	Montreal, Quebec
Building Type:	Municipal building
Contract date:	2018
Surface Area:	130,000 ft ²

Description

Inaugurated in 2011, this intergenerational and aquatic centre with a total area of 60,000 square feet is equipped with removable seating for 200 people, a recreational pool, an indoor terrace adjacent to the water basins, multifunctional community halls, a fitness room as well as dance, and warm-up studios.

Equipped with modern equipment adapted to a contemporary practice of physical activity and indoor recreation, this centre brings together all sports and leisure facilities of the City of Côte-Saint-Luc and offers local schools, city residents and neighbouring districts a variety of adapted activities.

Mandate

ENGIE Services is responsible for the maintenance and repair of air conditioning, humidification, ventilation, heating and control (HVAC) systems at the Aquatic and Community Center of Cote-Saint-Luc.

In addition to the Aquatic and Community Center, ENGIE is responsible for the maintenance and repair of HVAC systems for the following municipal buildings:

- Fire Department;
- Public works;
- Recreation and Park Building;
- Chalets at Pierre Elliot Trudeau Park and Rembrandt Park;
- 3 pumping stations.

Services

ENGIE Services' multidisciplinary team of plumbers, electricians and HVAC technicians ensures the proper operation of the Côte Saint-Luc Aquatic and Community Center and its other municipal buildings. Our services are as follows:

- Inventory of equipment before the start of the contract;
- Inspection visits, preventive maintenance and verification of HVAC systems in City buildings and controls;
- Repair services (non-urgent and urgent);
- Regular service calls and emergency service calls.

ENGIE Services manages, operates and maintains millions of square feet of diverse infrastructure in North America. With more than 25 years of expertise in Quebec in multi-technical management and energy efficiency of facilities, ENGIE Services is active in the municipal, transportation, defence, health and education, as well as the commercial, automotive, markets and industrial markets.
